NEW FLEET FOR KNIGHTS OF OLD

Kettering distribution company, Knights of Old Ltd, has recently introduced 18 new Scania trucks to its fleet in accordance with its continuous renewal programme and increased business volumes.

To keep in line with company's ongoing environmental policies, the 16 replacements and two additional vehicles all feature the Euro 4 engines and 'Opticruise' automatic gearshift which reduce harmful CO₂ emissions and improve fuel efficiencies.

The renewal programme enables Knights of Old to continue offering a reliable service along with exceptional fuel efficiencies, which has become a highly valued aspect of the company. High service levels and reducing the environmental impact are now a vital part the relationship between Knights of Old and its clients. With regular introductions of trucks with their new technologies, both the company and its clients benefit.

The new trucks which were supplied by Truckeast, Wellingborough, are now in operation and are being used for regional distribution as well as long distance and 24 hour trunk operations. Paul Abbott, operations director, said: "We are pleased to have reached an agreement with Truckeast to supply us with new vehicles. The use of Scania trucks has proven to be a great beneficial to our business and ongoing developments, as we can offer maximum uptime and reliability.

The technology of the Euro 4 engines and the 'Opticruise' are crucial in today's economic climate and sensitive environment."
